

DO NOT weaken New Jersey's Do not call law. I consider telemarketing calls harassment. The telephone calls disrupt my peace of mind and invade my home. I make it a point to never purchase anything that comes into my home unsolicited, however every time the telephone rings I must stop what I am doing to answer it. If you want to give into telemarketers have them call us at work - then when productivity is reduced by 50% because we are responding to unwanted and unasked for telephone calls businesses can lobby for another change in the law.
